

## Characteristics COMPLEMENTARY EQUIPMENT

### Complementary equipment

A correctly installed system guarantees safety and reliability.

The installation must be carried out in conformity with the local standards and regulations in force and it therefore follows that all the components which make up the installation must be of high quality and also conform to these requirements.

We advise you therefore to use Cardin electronic appliances and original accessories to complete your installation.

The Cardin accessories are designed to enhance the performance of our appliances and are made of top quality materials in order to guarantee a long operating life and maintain the aesthetic characteristics throughout time.

All the accessories bearing the Cardin trademark are built specifically for use in automatic opening installations.

Systems such as the safety edges have been tested in order to guarantee ample safety margins in all situations.

## Product features SEL50

### 500mm column

for 1 surface-mounted or embedded photoelectric cell.

Sectional columns to which all the CDR, SEL, APRO, VEDO and PASSO products can be fitted. They allow the installation of photoelectric cells and selector switches. The aluminium sectional structure makes them easy to reinstate after accidental knocks and bangs.
